Overview

Six composite axes, each scored 0–10. Higher is stronger; genre sets the target.

Summary

Every headline metric at a glance, grouped by theme.

🎓 READABILITY

Flesch Reading Ease 0–100; higher reads easier. 60–70 is mainstream.	73.5 · Easy
Grade Level (FK) US school grade needed to follow the prose.	6.2
Grade Level (ARI) Grade estimate from word and sentence length.	5.4
Grade Level (CLI) Coleman–Liau grade from character counts.	7.3
Grade Level (Fog) Gunning Fog; weights long words heavily.	8.8
Grade Level (SMOG) SMOG grade from polysyllable density.	9.3
Readability Volatility Scene-to-scene swing in ease. Lower is steadier.	±3.2

📖 VOCABULARY

Avg Word Length Mean letters per word.	4.3 ch
Content Word Ratio Share of non-filler, meaning-bearing words.	43.8%
Vocab Diversity (MATTR) Length-stable measure of word variety.	50.5%
Vocabulary Richness Unique words as a share of all words.	16.7%
Hapax Richness Words used exactly once.	8.1%
Phrase Originality Share of word-pairs that occur only once.	68.7%

☰ RHYTHM & CADENCE

Avg Sentence Length Mean words per sentence.	12.9 words
Sentence Length SD Higher = more varied sentence lengths.	11.1 words
Longest Sentence Your single longest sentence.	82 words
30+ Word Sentences Share of long, complex sentences.	7.5%
Sentence Autocorrelation Near 0 = varied; high = lengths cluster.	0.23
Paragraph Length SD Spread of paragraph sizes.	19.7 words
Paragraph Cadence High = long runs of same-size paragraphs.	0.22
Dialogue Ratio Share of words spoken inside quotes.	28.7%
Sentence Types Question / exclamation / fragment share (rest declarative).	Q 3.9% · ! 3.6% · frag 8.9%

✅ CONSISTENCY

Dominant Tense The tense most of your scenes are written in.	Past
Tense Consistency 0 scene(s) lean the other way.	100.0%
Dominant POV The grammatical person most scenes use.	First-person
POV Consistency 5 scene(s) shift person.	44.4%

☰ PARAGRAPHS

Avg Paragraph Length Mean words per paragraph.	24.9 words
Short Paragraphs Paragraphs of 50 words or fewer.	90.0%
Long Paragraphs Paragraphs of 150 words or more.	0.0%

 STYLE · PROSE CLEANLINESS

Adverb Density -ly adverbs per 1,000 words.	15.4 /1k
Filler Word % Hollow intensifiers and hedges (just, very, really).	1.7%
Glue Word % Connective padding that rarely adds meaning.	3.3%
Filter Verbs Distancing perception verbs — tells, not shows.	26.3 /1k
Passive Voice Be-verb + past participle constructions.	4.0 /1k
Said-Adverb Tags Adverb-propped dialogue tags ("said quietly").	0.9 /1k
Cliché Density Worn stock phrases per 10,000 words.	2.0 /10k

 OPENINGS & ENDINGS

Opener Repetition Sentences opening on your most-used word.	12.9% ("i")
Weak Scene Openings Scenes opening on a flat or filtered line.	11.1%
Weak Scene Endings Scenes ending on a limp or rambling line.	11.1%

 PACING

Pacing Index Composite of sentence, paragraph, dialogue & action.	6.2 / 10
Action Verb Density Kinetic, physical verbs per 1,000 words.	4.9 /1k
Scene Density Scene breaks per 1,000 words.	0.90 /1k

 AI TRANSITION SIGNALS

Total Transitions Formal connectives + overused LLM phrases.	2
Transition Words Single-word formal connectives (thus, moreover).	2
Transition Phrases Multi-word phrases LLMs overuse.	0
Sentence-Start Transitions Sentences that open on a transition.	0
Consecutive Transitions Back-to-back transition openings.	0
Unique Transition Types Distinct transition words/phrases used.	2

Detailed Breakdowns

Every metric in full — what it measures, how it is measured, how to read it, and the data behind it.

Readability

Flesch Reading Ease		73.5 · Easy
WHAT IT MEASURES	How easy your prose is to read, on a 0–100 scale where higher is easier.	
HOW IT MEASURES	$206.835 - 1.015 \times (\text{words per sentence}) - 84.6 \times (\text{syllables per word})$.	
HOW TO INTERPRET	90+ is very easy; 60–70 is mainstream fiction; below 50 reads as difficult. Most commercial novels sit 60–80.	
LEARN MORE	Wikipedia — Flesch–Kincaid	
Grade Level (FK)		6.2
WHAT IT MEASURES	The US school grade a reader needs to follow the prose (Flesch–Kincaid).	
HOW IT MEASURES	$0.39 \times (\text{words per sentence}) + 11.8 \times (\text{syllables per word}) - 15.59$.	
HOW TO INTERPRET	Most commercial and YA fiction lands at grade 5–8; literary fiction often 7–10. Lower is more accessible, not better.	
LEARN MORE	Wikipedia — Flesch–Kincaid	
Grade Level (ARI)		5.4
WHAT IT MEASURES	A grade estimate built from characters per word and words per sentence (ARI).	
HOW IT MEASURES	$4.71 \times (\text{characters per word}) + 0.5 \times (\text{words per sentence}) - 21.43$.	
HOW TO INTERPRET	Read it alongside the other grades; a wide spread between them signals an uneven register worth a look.	
LEARN MORE	Wikipedia — Automated Readability Index	
Grade Level (CLI)		7.3
WHAT IT MEASURES	A character-based grade level that ignores syllables (Coleman–Liau).	
HOW IT MEASURES	$0.0588 \times (\text{letters per 100 words}) - 0.296 \times (\text{sentences per 100 words}) - 15.8$.	
HOW TO INTERPRET	Useful as a cross-check on the syllable-based scores; large disagreement points to unusual word or sentence shapes.	
LEARN MORE	Wikipedia — Coleman–Liau Index	
Grade Level (Fog)		8.8
WHAT IT MEASURES	Years of formal education needed, weighting long words heavily (Gunning Fog).	
HOW IT MEASURES	$0.4 \times (\text{words per sentence} + 100 \times \text{polysyllabic-word ratio})$.	
HOW TO INTERPRET	Fiction usually reads 6–10. A high Fog with a normal FK means long words, not long sentences, are the load.	
LEARN MORE	Wikipedia — Gunning Fog Index	
Grade Level (SMOG)		9.3
WHAT IT MEASURES	A grade estimate driven by the density of polysyllabic words (SMOG).	
HOW IT MEASURES	$3.1291 + 1.043 \times \sqrt{(\text{polysyllables} \times 30 / \text{sentences})}$.	
HOW TO INTERPRET	SMOG is stable on longer texts and tends to run a little higher than FK. Treat the cluster of grades as a range.	
LEARN MORE	Wikipedia — SMOG	
Readability Volatility		±3.2
WHAT IT MEASURES	How consistent your reading ease is from scene to scene.	
HOW IT MEASURES	Standard deviation of each scene's Flesch Reading Ease (scenes of 50+ words).	
HOW TO INTERPRET	Under ±10 is steady; ±20+ means some scenes read much harder or easier than others — intentional for tense beats, a red flag if not.	

READABILITY BY SCENE

CHAPTER → SCENE	WORDS	FLESCH	FK
Chapter 09: The forbidden spell → Scene 9	823	68.7	6.6
Chapter 04: The blue lamp → Scene 4	1,211	69.0	7.0
Chapter 01: → Scene 1	1,060	69.8	7.6
Chapter 06: The Serene Man → Scene 6	1,021	71.7	6.9
Chapter 03: In the other World → Scene 3	1,388	73.3	6.7
Chapter 07: The Deception → Scene 7	1,004	73.3	6.0
Chapter 08: It Begins → Scene 8	1,143	76.2	5.2
Chapter 05: The fervent doorway → Scene 5	1,186	76.9	5.0
Chapter 02: When the Darkness Called My Name → Scene 2	1,165	77.5	6.2

 Vocabulary

Avg Word Length		4.3 ch
WHAT IT MEASURES	The mean number of letters per word.	
HOW IT MEASURES	Total letters ÷ total words.	
HOW TO INTERPRET	English prose averages ~4.5 characters. Higher suggests a more formal or technical register.	
Content Word Ratio		43.8%
WHAT IT MEASURES	The share of words that carry meaning rather than grammatical glue.	
HOW IT MEASURES	Non-stopword count ÷ total words × 100.	
HOW TO INTERPRET	Denser content-word ratios read as more informational; lower ratios read as more conversational and flowing.	
Vocab Diversity (MATTR)		50.5%
WHAT IT MEASURES	Vocabulary diversity that stays fair across books of different lengths.	
HOW IT MEASURES	Average type-token ratio over a sliding 500-word window (Moving-Average TTR).	
HOW TO INTERPRET	70%+ is rich and varied; under 60% signals repeated diction. Unlike raw richness, it isn't deflated by length.	
LEARN MORE	Wikipedia — Lexical diversity	
Vocabulary Richness		16.7%
WHAT IT MEASURES	The raw proportion of distinct words in the book.	
HOW IT MEASURES	Unique words ÷ total words × 100.	
HOW TO INTERPRET	Falls naturally as a book grows, so compare only to books of similar length; use MATTR for a length-fair read.	

MOST FREQUENT WORDS

WORD	COUNT
world	66
centinella	51
magic	45
voice	43
something	43
wizard	39
soufiane	35
inside	31
eyes	29

illuminating	12
overwhelming	12
mysteriously	12

Hapax Richness8.1%

- WHAT IT MEASURESHow much of your text is words used exactly once (hapax legomena).
- HOW IT MEASURESWords with a frequency of one ÷ total words × 100.
- HOW TO INTERPRETHigher means a wider, less repetitive vocabulary. Very high can also flag typos or inconsistent spellings.
- LEARN MORE[Wikipedia — Hapax legomenon](#)

Phrase Originality68.7%

- WHAT IT MEASURESHow original your two-word combinations are.
- HOW IT MEASURESDistinct adjacent word-pairs ÷ total word-pairs × 100.
- HOW TO INTERPRETHigh originality means fresh phrasing; a low score points to recurring stock combinations and crutch phrases.

≡ Rhythm & Cadence

Avg Sentence Length

WHAT IT MEASURES The mean number of words per sentence.

HOW IT MEASURES $\text{Total words} \div \text{total sentences}$.

HOW TO INTERPRET Fiction typically averages 12–18. Shorter reads faster and punchier; longer reads more measured and literary.

12.9 words

Sentence Length SD

WHAT IT MEASURES How much your sentence lengths vary — the engine of prose rhythm.

HOW IT MEASURES Standard deviation of the word count of every sentence.

HOW TO INTERPRET Higher is livelier: short and long sentences alternating. A low SD reads as monotone even when each sentence is fine.

LEARN MORE [Wikipedia — Sentence variety](#)

11.1 words

Longest Sentence

WHAT IT MEASURES The word count of your single longest sentence.

HOW IT MEASURES Maximum sentence length across the book (quoted in full below).

HOW TO INTERPRET One long sentence is fine for effect; check that it earns its length and isn't an accidental run-on.

82 words

YOUR LONGEST SENTENCE

Chapter 02: When the Darkness Called My Name → Scene 2

In a quite night when no one hear voices , it was too late to go back to sleep furthermore, i had to go to work at 07am so it was left about few hours before going out, so I decided not to sleep A cold air , sniffing voice in the room, and suddenly a black hole appeard in the center of the room it was so big absorbing the energy, and I was hopless to escape, it was so powerful.

SCENES WITH 30+ WORD SENTENCES

CHAPTER → SCENE	COUNT
Chapter 03: In the other World → Scene 3	14
Chapter 01: → Scene 1	11
Chapter 02: When the Darkness Called My Name → Scene 2	9
Chapter 04: The blue lamp → Scene 4	6
Chapter 08: It Begins → Scene 8	6
Chapter 06: The Serene Man → Scene 6	5
Chapter 07: The Deception → Scene 7	3
Chapter 09: The forbidden spell → Scene 9	3
Chapter 05: The fervent doorway → Scene 5	1

30+ Word Sentences

WHAT IT MEASURES The share of sentences longer than 30 words.

HOW IT MEASURES $\text{Sentences over 30 words} \div \text{total sentences} \times 100$.

HOW TO INTERPRET A few percent is normal. A high share can tire readers and often hides sentences that want splitting.

7.5%

Sentence Autocorrelation

WHAT IT MEASURES Whether a sentence's length predicts the next one's.

HOW IT MEASURES Lag-1 autocorrelation of sentence lengths (−1 to +1).

HOW TO INTERPRET Near 0 is ideal — lengths vary freely. High positive means long runs of similar-length sentences (a droning cadence).

0.23

Paragraph Length SD

19.7 words

WHAT IT MEASURES	How much your paragraph lengths vary.
HOW IT MEASURES	Standard deviation of per-paragraph word counts.
HOW TO INTERPRET	Some spread is healthy — mixing short beats with fuller passages. Very low SD makes the page look uniform and heavy.

Paragraph Cadence

0.22

WHAT IT MEASURES	Whether a paragraph's size predicts the next one's — the page's cadence.
HOW IT MEASURES	Lag-1 autocorrelation of paragraph lengths (−1 to +1).
HOW TO INTERPRET	Under 0.10 reads as varied; 0.40+ means long stretches of same-size paragraphs (blocky, monotone page rhythm).

Dialogue Ratio

28.7%

WHAT IT MEASURES	The share of your words that are spoken inside quotation marks.
HOW IT MEASURES	Words within quotes ÷ total words × 100.
HOW TO INTERPRET	Dialogue-heavy books (40%+) read fast; description-led literary work often sits 15–25%. Neither is better — genre decides.

DIALOGUE BY SCENE

CHAPTER → SCENE	DIALOGUE %
Chapter 03: In the other World → Scene 3	47.0%
Chapter 08: It Begins → Scene 8	44.3%
Chapter 07: The Deception → Scene 7	39.0%
Chapter 09: The forbidden spell → Scene 9	25.5%
Chapter 05: The fervent doorway → Scene 5	25.1%
Chapter 06: The Serene Man → Scene 6	20.8%
Chapter 02: When the Darkness Called My Name → Scene 2	19.5%
Chapter 04: The blue lamp → Scene 4	16.0%
Chapter 01: → Scene 1	15.9%

Declarative

83.7%

Questions

3.9%

✔ Consistency

Tense Consistency	100.0%
POV Consistency	44.4%

SCENES THAT SHIFT POV

CHAPTER → SCENE	READS	BOOK IS
Chapter 01: → Scene 1	Third-person	First-person
Chapter 04: The blue lamp → Scene 4	Third-person	First-person
Chapter 05: The fervent doorway → Scene 5	Third-person	First-person
Chapter 06: The Serene Man → Scene 6	Third-person	First-person
Chapter 09: The forbidden spell → Scene 9	Third-person	First-person

 Paragraphs

Avg Paragraph Length24.9 words

WHAT IT MEASURES	The mean number of words per paragraph.
HOW IT MEASURES	Total paragraph words ÷ paragraph count.
HOW TO INTERPRET	Commercial fiction favours shorter paragraphs (30–70 words); dense literary prose runs longer. Watch for accidental walls.

AVG PARAGRAPH LENGTH BY SCENE

CHAPTER → SCENE	WORDS/PARA
Chapter 02: When the Darkness Called My Name → Scene 2	39.2
Chapter 01: → Scene 1	35.7
Chapter 04: The blue lamp → Scene 4	25.9
Chapter 09: The forbidden spell → Scene 9	25.3
Chapter 03: In the other World → Scene 3	23.8
Chapter 06: The Serene Man → Scene 6	22.4
Chapter 08: It Begins → Scene 8	22.0
Chapter 05: The fervent doorway → Scene 5	20.8
Chapter 07: The Deception → Scene 7	19.9

Short Paragraphs90.0%

WHAT IT MEASURES	The share of paragraphs that are 50 words or fewer.
HOW IT MEASURES	$\text{Paragraphs} \leq 50 \text{ words} \div \text{total paragraphs} \times 100$.
HOW TO INTERPRET	Short paragraphs create white space and speed; a very high share can feel choppy or underdeveloped.

Long Paragraphs0.0%

WHAT IT MEASURES	The share of paragraphs that are 150 words or more.
HOW IT MEASURES	$\text{Paragraphs} \geq 150 \text{ words} \div \text{total paragraphs} \times 100$.
HOW TO INTERPRET	Occasional long paragraphs are fine for immersion; a high share slows the page and can bury key beats.

⚡ Pacing

Pacing Index		6.2 / 10
WHAT IT MEASURES	A 0–10 estimate of overall narrative pace.	
HOW IT MEASURES	Equal-weight average of four signals: sentence length, short-paragraph share, dialogue density, and action-verb density.	
HOW TO INTERPRET	2.5–4.5 reads literary and immersive; 5.5–7.5 reads brisk and commercial; 7.5+ reads thriller-fast. Genre sets the target.	

PACING BY SCENE

CHAPTER → SCENE	INDEX / 10
Chapter 01: → Scene 1	4.7
Chapter 06: The Serene Man → Scene 6	5.5
Chapter 04: The blue lamp → Scene 4	5.8
Chapter 09: The forbidden spell → Scene 9	6.0
Chapter 02: When the Darkness Called My Name → Scene 2	6.1
Chapter 03: In the other World → Scene 3	6.3
Chapter 05: The fervent doorway → Scene 5	6.4
Chapter 07: The Deception → Scene 7	7.0
Chapter 08: It Begins → Scene 8	7.2

Action Verb Density		4.9 / 1k
WHAT IT MEASURES	The density of physical, kinetic verbs (sprinted, grabbed, slammed).	
HOW IT MEASURES	$\text{Matched action verbs} \div \text{total words} \times 1,000$.	
HOW TO INTERPRET	Under 5 / 1k reads introspective; 10+ / 1k reads action-forward. Low isn't wrong for character-driven work.	

ACTION VERBS

VERB	COUNT
escape	6
fell	6
fight	4
corner	3
twisted	3
fire	3
escaped	3
hit	2
struck	2
fall	2
pierce	1
rush	1
ran	1
dodge	1
grip	1
bound	1
rushed	1
exploded	1
collapsed	1
tear	1

Scene Density

WHAT IT MEASURES

HOW IT MEASURES

HOW TO INTERPRET

How many scenes you have per 1,000 words.

Scenes with content ÷ total words × 1,000.

Long scenes (under 1 / 1k) immerse; frequent breaks (2+ / 1k) compress time and add momentum.

0.90 /1k

👁 AI Transition Signals

AI Transition Signals		2 total
WHAT IT MEASURES	Formal connectives and set phrases that large language models overuse.	
HOW IT MEASURES	Counts of single-word transitions (thus, moreover) plus multi-word phrases (as a result, in conclusion).	
HOW TO INTERPRET	Natural fiction uses few. Clusters — especially back-to-back sentence openers — read as machine-smoothed prose.
