Overview

Six composite axes, each scored 0–10. Higher is stronger; genre sets the target.

Summary

Every headline metric at a glance, grouped by theme.

🎓 READABILITY

Flesch Reading Ease 0–100; higher reads easier. 60–70 is mainstream.	75.2 · Easy
Grade Level (FK) US school grade needed to follow the prose.	6.5
Grade Level (ARI) Grade estimate from word and sentence length.	6.5
Grade Level (CLI) Coleman–Liau grade from character counts.	7.7
Grade Level (Fog) Gunning Fog; weights long words heavily.	8.9
Grade Level (SMOG) SMOG grade from polysyllable density.	9.0
Readability Volatility Scene-to-scene swing in ease. Lower is steadier.	±6.5

📖 VOCABULARY

Avg Word Length Mean letters per word.	4.3 ch
Content Word Ratio Share of non-filler, meaning-bearing words.	44.0%
Vocab Diversity (MATTR) Length-stable measure of word variety.	47.0%
Vocabulary Richness Unique words as a share of all words.	17.3%
Hapax Richness Words used exactly once.	8.5%
Phrase Originality Share of word-pairs that occur only once.	65.0%

≡ RHYTHM & CADENCE

Avg Sentence Length Mean words per sentence.	15.1 words
Sentence Length SD Higher = more varied sentence lengths.	12.2 words
Longest Sentence Your single longest sentence.	67 words
30+ Word Sentences Share of long, complex sentences.	11.3%
Sentence Autocorrelation Near 0 = varied; high = lengths cluster.	0.02
Paragraph Length SD Spread of paragraph sizes.	20.6 words
Paragraph Cadence High = long runs of same-size paragraphs.	-0.10
Dialogue Ratio Share of words spoken inside quotes.	4.2%

≡ PARAGRAPHS

Avg Paragraph Length Mean words per paragraph.	37.2 words
Short Paragraphs Paragraphs of 50 words or fewer.	73.1%
Long Paragraphs Paragraphs of 150 words or more.	0.0%

 STYLE · PROSE CLEANLINESS

Adverb Density -ly adverbs per 1,000 words.	17.2 /1k
Filler Word % Hollow intensifiers and hedges (just, very, really).	2.0%
Glue Word % Connective padding that rarely adds meaning.	4.0%
Filter Verbs Distancing perception verbs — tells, not shows.	19.2 /1k
Passive Voice Be-verb + past participle constructions.	4.1 /1k
Said-Adverb Tags Adverb-propped dialogue tags ("said quietly").	0.5 /1k
Cliché Density Worn stock phrases per 10,000 words.	0.0 /10k

 OPENINGS & ENDINGS

Opener Repetition Sentences opening on your most-used word.	22.6% ("the")
Weak Scene Openings Scenes opening on a flat or filtered line.	2.4%
Weak Scene Endings Scenes ending on a limp or rambling line.	7.1%

 PACING

Pacing Index Composite of sentence, paragraph, dialogue & action.	4.7 / 10
Action Verb Density Kinetic, physical verbs per 1,000 words.	6.9 /1k
Scene Density Scene breaks per 1,000 words.	4.77 /1k

 AI TRANSITION SIGNALS

Total Transitions Formal connectives + overused LLM phrases.	4
Transition Words Single-word formal connectives (thus, moreover).	4
Transition Phrases Multi-word phrases LLMs overuse.	0
Sentence-Start Transitions Sentences that open on a transition.	0
Consecutive Transitions Back-to-back transition openings.	0
Unique Transition Types Distinct transition words/phrases used.	3

Detailed Breakdowns

Every metric in full — what it measures, how it is measured, how to read it, and the data behind it.

Readability

Flesch Reading Ease		75.2 · Easy
WHAT IT MEASURES	How easy your prose is to read, on a 0–100 scale where higher is easier.	
HOW IT MEASURES	$206.835 - 1.015 \times (\text{words per sentence}) - 84.6 \times (\text{syllables per word})$.	
HOW TO INTERPRET	90+ is very easy; 60–70 is mainstream fiction; below 50 reads as difficult. Most commercial novels sit 60–80.	
LEARN MORE	Wikipedia — Flesch–Kincaid	
Grade Level (FK)		6.5
WHAT IT MEASURES	The US school grade a reader needs to follow the prose (Flesch–Kincaid).	
HOW IT MEASURES	$0.39 \times (\text{words per sentence}) + 11.8 \times (\text{syllables per word}) - 15.59$.	
HOW TO INTERPRET	Most commercial and YA fiction lands at grade 5–8; literary fiction often 7–10. Lower is more accessible, not better.	
LEARN MORE	Wikipedia — Flesch–Kincaid	
Grade Level (ARI)		6.5
WHAT IT MEASURES	A grade estimate built from characters per word and words per sentence (ARI).	
HOW IT MEASURES	$4.71 \times (\text{characters per word}) + 0.5 \times (\text{words per sentence}) - 21.43$.	
HOW TO INTERPRET	Read it alongside the other grades; a wide spread between them signals an uneven register worth a look.	
LEARN MORE	Wikipedia — Automated Readability Index	
Grade Level (CLI)		7.7
WHAT IT MEASURES	A character-based grade level that ignores syllables (Coleman–Liau).	
HOW IT MEASURES	$0.0588 \times (\text{letters per 100 words}) - 0.296 \times (\text{sentences per 100 words}) - 15.8$.	
HOW TO INTERPRET	Useful as a cross-check on the syllable-based scores; large disagreement points to unusual word or sentence shapes.	
LEARN MORE	Wikipedia — Coleman–Liau Index	
Grade Level (Fog)		8.9
WHAT IT MEASURES	Years of formal education needed, weighting long words heavily (Gunning Fog).	
HOW IT MEASURES	$0.4 \times (\text{words per sentence} + 100 \times \text{polysyllabic-word ratio})$.	
HOW TO INTERPRET	Fiction usually reads 6–10. A high Fog with a normal FK means long words, not long sentences, are the load.	
LEARN MORE	Wikipedia — Gunning Fog Index	
Grade Level (SMOG)		9.0
WHAT IT MEASURES	A grade estimate driven by the density of polysyllabic words (SMOG).	
HOW IT MEASURES	$3.1291 + 1.043 \times \sqrt{(\text{polysyllables} \times 30 / \text{sentences})}$.	
HOW TO INTERPRET	SMOG is stable on longer texts and tends to run a little higher than FK. Treat the cluster of grades as a range.	
LEARN MORE	Wikipedia — SMOG	
Readability Volatility		±6.5
WHAT IT MEASURES	How consistent your reading ease is from scene to scene.	
HOW IT MEASURES	Standard deviation of each scene's Flesch Reading Ease (scenes of 50+ words).	
HOW TO INTERPRET	Under ±10 is steady; ±20+ means some scenes read much harder or easier than others — intentional for tense beats, a red flag if not.	

READABILITY BY SCENE

CHAPTER → SCENE	WORDS	FLESCH	FK
A Village Girl → Goldilocks at Home	168	61.6	10.6
The Bear Family → A Cozy Cottage	176	61.6	10.9
The Bear Family → The Honey Store	259	62.3	11.0

Into the Forest → Smoke Through the Trees	222	81.3	5.6
Wake Up! → The Confrontation	195	82.0	4.2
Wake Up! → Through the Garden	199	84.1	4.6
The Chairs → The Broken Leg	199	91.3	3.0

 Vocabulary

Avg Word Length		4.3 ch
WHAT IT MEASURES	The mean number of letters per word.	
HOW IT MEASURES	Total letters ÷ total words.	
HOW TO INTERPRET	English prose averages ~4.5 characters. Higher suggests a more formal or technical register.	
Content Word Ratio		44.0%
WHAT IT MEASURES	The share of words that carry meaning rather than grammatical glue.	
HOW IT MEASURES	Non-stopword count ÷ total words × 100.	
HOW TO INTERPRET	Denser content-word ratios read as more informational; lower ratios read as more conversational and flowing.	
Vocab Diversity (MATTR)		47.0%
WHAT IT MEASURES	Vocabulary diversity that stays fair across books of different lengths.	
HOW IT MEASURES	Average type-token ratio over a sliding 500-word window (Moving-Average TTR).	
HOW TO INTERPRET	70%+ is rich and varied; under 60% signals repeated diction. Unlike raw richness, it isn't deflated by length.	
LEARN MORE	Wikipedia — Lexical diversity	
Vocabulary Richness		17.3%
WHAT IT MEASURES	The raw proportion of distinct words in the book.	
HOW IT MEASURES	Unique words ÷ total words × 100.	
HOW TO INTERPRET	Falls naturally as a book grows, so compare only to books of similar length; use MATTR for a length-fair read.	

MOST FREQUENT WORDS

Hapax Richness8.5%

- WHAT IT MEASURESHow much of your text is words used exactly once (hapax legomena).
- HOW IT MEASURESWords with a frequency of one ÷ total words × 100.
- HOW TO INTERPRETHigher means a wider, less repetitive vocabulary. Very high can also flag typos or inconsistent spellings.
- LEARN MORE[Wikipedia — Hapax legomenon](#)

Phrase Originality65.0%

- WHAT IT MEASURESHow original your two-word combinations are.
- HOW IT MEASURESDistinct adjacent word-pairs ÷ total word-pairs × 100.
- HOW TO INTERPRETHigh originality means fresh phrasing; a low score points to recurring stock combinations and crutch phrases.

≡ Rhythm & Cadence

Avg Sentence Length

WHAT IT MEASURES

HOW IT MEASURES

HOW TO INTERPRET

The mean number of words per sentence.

Total words ÷ total sentences.

Fiction typically averages 12–18. Shorter reads faster and punchier; longer reads more measured and literary.

15.1 words

Sentence Length SD

WHAT IT MEASURES

HOW IT MEASURES

HOW TO INTERPRET

LEARN MORE

How much your sentence lengths vary — the engine of prose rhythm.

Standard deviation of the word count of every sentence.

Higher is livelier: short and long sentences alternating. A low SD reads as monotone even when each sentence is fine.

[Wikipedia — Sentence variety](#)

12.2 words

Longest Sentence

WHAT IT MEASURES

HOW IT MEASURES

HOW TO INTERPRET

The word count of your single longest sentence.

Maximum sentence length across the book (quoted in full below).

One long sentence is fine for effect; check that it earns its length and isn't an accidental run-on.

67 words

YOUR LONGEST SENTENCE

Aftermath → The Long Run Home

At the mushroom ring she stopped for one moment and looked at the perfect circle of pale mushrooms and thought that she would not step inside it, and she would not step inside any cottage that was not hers, and she would not go into the forest alone, and she would not do any of the things she had done today, if she could do today differently.

SCENES WITH 30+ WORD SENTENCES

30+ Word Sentences

WHAT IT MEASURES

HOW IT MEASURES

HOW TO INTERPRET

The share of sentences longer than 30 words.

Sentences over 30 words ÷ total sentences × 100.

A few percent is normal. A high share can tire readers and often hides sentences that want splitting.

11.3%

Sentence Autocorrelation

0.02

WHAT IT MEASURES	Whether a sentence's length predicts the next one's.
HOW IT MEASURES	Lag-1 autocorrelation of sentence lengths (−1 to +1).
HOW TO INTERPRET	Near 0 is ideal — lengths vary freely. High positive means long runs of similar-length sentences (a droning cadence).

Paragraph Length SD

20.6 words

WHAT IT MEASURES	How much your paragraph lengths vary.
HOW IT MEASURES	Standard deviation of per-paragraph word counts.
HOW TO INTERPRET	Some spread is healthy — mixing short beats with fuller passages. Very low SD makes the page look uniform and heavy.

Paragraph Cadence

-0.10

WHAT IT MEASURES	Whether a paragraph's size predicts the next one's — the page's cadence.
HOW IT MEASURES	Lag-1 autocorrelation of paragraph lengths (−1 to +1).
HOW TO INTERPRET	Under 0.10 reads as varied; 0.40+ means long stretches of same-size paragraphs (blocky, monotone page rhythm).

Dialogue Ratio

4.2%

WHAT IT MEASURES	The share of your words that are spoken inside quotation marks.
HOW IT MEASURES	Words within quotes ÷ total words × 100.
HOW TO INTERPRET	Dialogue-heavy books (40%+) read fast; description-led literary work often sits 15–25%. Neither is better — genre decides.

DIALOGUE BY SCENE

CHAPTER → SCENE	DIALOGUE %
A Village Girl → Mother's Warning	42.1%
Into the Forest → The Fox Who Wouldn't Help	37.4%
Wake Up! → The Confrontation	22.1%
Aftermath → Mother's Embrace	21.8%
The Bears Return → Someone's Been Here	14.2%
The Bear Family → The Morning Routine	11.0%
The Bears Return → Baby Bear's Sorrow	7.7%

 Paragraphs

Avg Paragraph Length

37.2 words

WHAT IT MEASURES	The mean number of words per paragraph.
HOW IT MEASURES	Total paragraph words ÷ paragraph count.
HOW TO INTERPRET	Commercial fiction favours shorter paragraphs (30–70 words); dense literary prose runs longer. Watch for accidental walls.

AVG PARAGRAPH LENGTH BY SCENE

CHAPTER → SCENE	WORDS/PARA
The Bear Family → The Honey Store	65.0
Aftermath → A Better Lock	58.5
Aftermath → The Long Run Home	52.8
The Unlocked Door → The Warm Kitchen	47.4
The Bears Return → Papa Bear's Fury	47.0
Into the Forest → The Great Oaks	44.8
The Bear Family → A Cozy Cottage	44.8
The Beds → Baby Bear's Bed	44.6
The Chairs → Baby Bear's Chair	44.4
The Bears Return → Baby Bear's Sorrow	44.2
A Village Girl → The Golden Morning	43.8
The Beds → The Soft Bed	42.8
A Village Girl → Goldilocks at Home	42.3
The Bear Family → Grumpy Grandpa	41.5
A Village Girl → The Path Begins	40.4
Wake Up! → Through the Garden	39.8

The Chairs → The Broken Leg	33.2
The Beds → Goldilocks Dreams	32.7
A Village Girl → Mother's Warning	30.6
Wake Up! → Three Bears in the Doorway	29.8
The Unlocked Door → First Knock	29.3
The Bears Return → Someone's Been Here	29.1
Wake Up! → The Confrontation	28.4
Aftermath → Mother's Embrace	27.6
Into the Forest → The Fox Who Wouldn't Help	19.8

Short Paragraphs

73.1%

WHAT IT MEASURES	The share of paragraphs that are 50 words or fewer.
HOW IT MEASURES	$\text{Paragraphs} \leq 50 \text{ words} \div \text{total paragraphs} \times 100$.
HOW TO INTERPRET	Short paragraphs create white space and speed; a very high share can feel choppy or underdeveloped.

Long Paragraphs

0.0%

WHAT IT MEASURES	The share of paragraphs that are 150 words or more.
HOW IT MEASURES	$\text{Paragraphs} \geq 150 \text{ words} \div \text{total paragraphs} \times 100$.
HOW TO INTERPRET	Occasional long paragraphs are fine for immersion; a high share slows the page and can bury key beats.

Passive Voice

4.1 /1k

WHAT IT MEASURES	How often the receiver of an action becomes the subject ("the door was opened").
HOW IT MEASURES	Be-verb + past-participle matches ÷ total words × 1,000 (an upper-bound heuristic).
HOW TO INTERPRET	Under 8 / 1k is active; 15+ / 1k reads distant and formal. Some passive is right when the actor is unknown.

Weak Scene Openings

WHAT IT MEASURES

HOW IT MEASURES

HOW TO INTERPRET

The share of scenes whose first sentence opens on a measurably weak construction.

Scenes (3+ sentences) whose opener is existential, filter-led, or adverb-led ÷ evaluated scenes × 100.

Under ~15% is healthy; a high share signals a default opening reflex. Open on image, action, or dialogue instead.

2.4%

WEAK SCENE OPENINGS

CHAPTER → SCENE	WHY	FIRST SENTENCE
A Village Girl → The Golden Morning	Existential / weak “to be” opening	It was one of those mornings that seem designed specifically to undermine good intentions.

Weak Scene Endings

WHAT IT MEASURES

HOW IT MEASURES

HOW TO INTERPRET

The share of scenes whose last sentence ends on a limp or rambling note.

Scenes (3+ sentences) whose closer trails off, overruns 45 words, or is existential ÷ evaluated scenes × 100.

Strong endings are short and concrete. Under ~15% is healthy; sharpen the flagged final lines below.

7.1%

WEAK SCENE ENDINGS

CHAPTER → SCENE		WHY	LAST SENTENCE
A Village Girl → The Golden Morning	Overlong closing sentence (55 words)		Goldilocks stood at the well and looked at the path, and the path looked back at her, and the robin sang again from somewhere in the direction of the forest, an...
The Beds → The Soft Bed	Existential / weak “to be” closing		It was in the corner, small and neat.
The Bears Return → Papa Bear’s Fury	Overlong closing sentence (46 words)		He was also, under the anger, frightened in a low, unexamined way — not for himself but for Mama Bear and Baby Bear, and for the cottage that was their home, an...

 Pacing

Pacing Index

4.7 / 10

WHAT IT MEASURES	A 0–10 estimate of overall narrative pace.
HOW IT MEASURES	Equal-weight average of four signals: sentence length, short-paragraph share, dialogue density, and action-verb density.
HOW TO INTERPRET	2.5–4.5 reads literary and immersive; 5.5–7.5 reads brisk and commercial; 7.5+ reads thriller-fast. Genre sets the target.

Action Verb Density

6.9 /1k

- WHAT IT MEASURES

HOW IT MEASURES

HOW TO INTERPRET
- The density of physical, kinetic verbs (sprinted, grabbed, slammed).

Matched action verbs ÷ total words × 1,000.

Under 5 / 1k reads introspective; 10+ / 1k reads action-forward. Low isn't wrong for character-driven work.

ACTION VERBS

VERB	COUNT
ran	9
fire	6
pushed	5
climbed	5
hammer	3
swung	3
dropped	3
crack	3
rolled	2
climb	2
break	2
buckled	1
fell	1
tail	1
shot	1
grabbed	1
gripped	1
corner	1
bolted	1
swing	1

Scene Density

4.77 /1k

- WHAT IT MEASURES

HOW IT MEASURES

HOW TO INTERPRET
- How many scenes you have per 1,000 words.

Scenes with content ÷ total words × 1,000.

Long scenes (under 1 / 1k) immerse; frequent breaks (2+ / 1k) compress time and add momentum.

👁 AI Transition Signals

AI Transition Signals		4 total
WHAT IT MEASURES	Formal connectives and set phrases that large language models overuse.	
HOW IT MEASURES	Counts of single-word transitions (thus, moreover) plus multi-word phrases (as a result, in conclusion).	
HOW TO INTERPRET	Natural fiction uses few. Clusters — especially back-to-back sentence openers — read as machine-smoothed prose.
